

Okon Antia, PT, DPT is the Founder/Principal of Campus Motion Sports Therapy & Sports Recovery. His company has been providing sports medicine, physical therapy, injury prevention, and sports recovery services to the community since 2019. They provide these services in traditional brick & mortar offices as well as #OnCampus at the convenience of your work office, school, club sports field, or gym via their innovative Campus Motion Mobile Clinic. This is a Sprinter Van built out into a mobile clinic to allow their team to serve patients and clients wherever they are, whatever “campus” they prefer. They currently have a brick & mortar office in the Fairfield area of Cypress, TX (NW Houston) and will be adding a 2nd location to the Towne Lake/Bridgeland area of Cypress in Spring 2022. This 2nd location will add cryotherapy and red light therapy services to their existing sports recovery services as they continue to meet the recovery/injury prevention needs of the community. Their goal is to switch the sports health paradigm in the community from reactionary episodic care to proactive preventative care and to make it as convenient and seamless as possible. This is such a unique approach to healthcare delivery that creates an accommodation to all that desire their services.
